

Helical Masonry Repairs – Extensive Repairs to Grange Farm, Darlton, Newark

"I was pleased with the way in which this repair was completed and the fact that it came with a 10 year warranty also pleased my client".

Structural Engineers

Client: Wignall and Sons Ltd
Consultant: D Perkins Associates
Value: £8,400
Project Duration: 1 Week
Completion Date: 2008

The property at Darlton had suffered settlement to the front right hand corner. With the installation of helical wire we were able to re-distribute the masonry loadings and tie back the effected structure back in to the main body of the property, restoring the buildings structural integrity

Because a mortgage would be required at a later date the repairs were backed up with a 10 year insurance backed structural warranty
